EXPERIENCE

Jan - Sep 2018   **> Full Stack Developer** / *Foodly / Berlin*

Responsible for building Foodly's web application with `Meteor`, `React`, `Node.js` and `MongoDB` using Continuous Integration. Prototyped an iOS mobile app version using `React Native`.

Mar - Aug 2017   **> Full Stack Development Intern** / *Decidata / Mexico City*

Created frontend for new product using `Django` and `Javascript`. Implemented automated python `unit tests`. Worked on a new version of the platform, including implementing `React` as a frontend framework to a `Django` backend and changing the database structure

Mar - Jun 2015   **> Web Development Intern** / *Pjunger Design / Tübingen*

Responsible for the conception and development of websites in a `Wordpress` environment. Created Wordpress themes, built responsive websites with `HTML, CSS, Bootstrap`, and optimized existing websites in respect to usability, design and SEO.
